

Maximum Load: 10 Tonnes

Rubber Wheel Chock With Handle 295L x 150W x 190H

Product SKU: 6008807

Our selection of standard rubber wheel chocks suitable for various vehicles from caravans, car trailers, heavy goods vehicles and more.

Collection of wheel chocks made entirely from a hardwearing blend of SBR/NR rubber. They offer a longer service life in comparison to plastic alternatives but are a lot heavier to handle. Each chock comes with either an eye bolt, handle or rope to make help make handling easier. For loads up to 10 tonnes, the 6008807 is a commonly used HGV wheel chock. It has a small amount of coring in the rubber to help reduce the weight and cost of the item. This is the only chock in the range to feature a built-in handle. Safety notice - Only select the appropriate wheel chock according to the type and size of your vehicle.

Colour: Black

Material: NR/SBR

Operating temperature range: -15°C to 70°C

Physical Property	Unit	Typical Values
Hardness	ShA	75
Elongation at Break	%	200
Tensile Strength	MPa	4
Weight	KG	4.25
